DETAILED ACTION

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 22-25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Applicant recites in claim 22 the following limitation " wherein said at least one amplifier device has a gain substantially the inverse of the gain of the amplifier device in said amplifier circuit. The amplifier circuit does not comprising an amplifier device.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 15, 18 and 24 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 15 recites the limitation "the component characteristics" in lines 2 and 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 18 recites the limitation "the at least one transistor device" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 24 recites the limitation "the at least one phase shifted output" in line 6. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

Claims 14, 16, 17, 19-21 and 26 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: With regards to claims 14, 16, 17 and 19-21, the prior art of record does not disclose or fairly teach said adjustable phase shift being adjusted to have substantially the opposite value of a phase shift of said transconductor device. With regards to claim 26, the prior art does not disclose or fairly teach generating a current signal based on a voltage of an input signal; and adjusting a phase shift of a resistor device to substantially the opposite of a phase shift of said current signal.
